About This Game

Selection of the pilot and general information about the player's base

The game takes place on the continent, inhabited by 3 nations: the Chuns, Hussians and Burmese. They differ in the unique design of the balloon and special attack. After selecting one of the pilots, the player moves to the base, decorated in the form of an airship with rooms. At the start only three rooms are open, as the campaign progresses, their number grows to thirteen. Seven of them can be pumped to level 10. The player can distribute the money earned in battles for the development of rooms as he wishes.

The global map and the essence of the strategic part of the game

After getting acquainted with the base, the player gets invitation to the planning room with a global map, which lists available missions with timers and the current levels of pirate strength in the kingdoms.

Kingdoms are expose to repeated attacks by pirates. To win, you need to find the base of the pirates and destroy it. (This can be done with the help of reconnaissance or defensive towers on the ground.) If the power of pirates in any of the kingdoms reaches the limit - the player loses the campaign.

Battle victories can slow the pace of pirates, but the only way to reduce the power of pirates in the kingdom - to build a defensive tower. However, to build a tower in one place means to miss an attack in another. Therefore, it is important that the player has the right to choose the order of missions.

Battle with pirates and the arsenal of the player

Selecting on the global map the region attacked by pirates, the player goes into battle, where he moves in the real time move by

his balloon and tries to destroy all the opponents, simultaneously collecting the coins scattered in level.

Arsenal:

- Spears, mounted on the left and right sides of the wicker basket, are used for horizontal near attacks.
 - The anchor suspended under the basket is used for vertical near attack.
- The guns are used for remote attacks and are divided into carters, small and large-caliber guns. The player can install one gun on the left and right side.
- Special attack is a reset of the object (for each people - its own) down. He falls, incidentally destroying all the enemies, but hitting them is more difficult than standard attacks.
- Bonuses - auxiliary tools to facilitate the fight. Players acquire them in a special room on an airship. Activated instantly and - depending on the type - restore the ""life"" of the balloon, conduct an attack on all visible enemies, temporarily turn on the ""God mode"", etc.

In case of victory, the player receives coins - a fee and collected at a level - that he uses to improve rooms, replenish ammunition and bonuses for further battles.

Non-standard missions

In addition to standard fights, the player is expected to have two more types of missions:

Construction of the tower: destroy enemies, and also build a tower - we deliver the block after block and install them to the right places.

"Tyr", that is a fight with pirates in the region in which a defensive tower has already been built: we shoot off opponents from the turret cannon, so that none of them reaches the ground.

Victory Conditions

By improving the intelligence room to level 10 or building 6 towers, the player opens access to the final mission. On the basis of pirates the ""boss"" is waiting for him, overcoming which the player completes the campaign victory. (We remind you that if the power of pirates in any of the kingdoms reaches the limit - the player loses the campaign.)

The approximate duration of the campaign is 3-5 hours.

extremely funny game about big old steam punk styled air balloons:

everything is greatly designed, if you are a lover of steampunk style (and you can't be a lover, as steampunk is cute)))

you just can't miss this game.

earn money, win the fights, speculate the goods, enjoy beautiful levels design and developers' sense of humour :))). Wow this game is bad. 99 cents was too much.. Very good game for very good price! I like the game even though it has some bugs here and there.. i'm not sure i've ever played a steam punk game before; i know the style, i've seen a lot in internet; but the game opens a whole steampunk world of air balloons: the characters, the interfaces, overall design - great style, you can get the game for steampunk only!

next you have a garage where you upgrade and control your air baloon prior; world of 4 kingdoms, market where you can speculate different goods and earn on logistics and battles! you air baloon is armed with cannons that shoot cannonballs!

just take care of ballistics and you will defeat your enemies :). Nice small game with a good portion of humor and a mechanic that you don't see to often.
